

ICT Department (Information and Communications Technology)

Student learning and achievement is central to all of our activities in School District No. 48.

Our goal is to use technology to create an environment where students and staff are able to access, retrieve and use information to support their learning or work-related activities.

As such, the School District supports all its members in becoming technologically literate, life-long learners who are able to interact successfully in a technological environment to achieve their personal, educational and workplace goals.
