

The Board of Education, School District No. 48 (Sea to Sky), wishes to provide the students of the school district with a safe, effective and efficient transportation system to and from school. Although the Board is under no obligation to provide transportation as there is no statutory requirement for its provision they have decided to provide school bus transportation for students under certain circumstances as outlined in Regulations 701.1

The Board considers the riding of the school busses to be a privilege. The Board expects all students who are being transported under the auspices of the school district to obey Policy No. 502.1, District Code of Conduct and Policy No. 503.1, Transportation Conduct with its accompanying Regulation and Administrative Procedures to ensure the safe operation of the busses under its jurisdiction.

The Regulation accompanying this Policy provides specific direction on the requirements for student bus routes.
